It is, then, only with diffidence that the present volume is offered for the perusal of the public; for on any question of historical fact, still more of criticism, there may, and indeed must, be two opinions. Hence, in the latter department at least, that of comment, no care, however scrupulous, no investigation, however thorough, can prevent some people disagreeing with the views put forward. The most the historian can effect is to present to the reader all the available facts, and then leave him to form his own judgment. Such a procedure does not exclude comment, but renders it suggestive and stimulating rather than final. Much depends, in this respect, on the point of view from which one sets out. The writer has no doubt that readers and students of Hamley (at present our only strategical text-book) will profoundly disagree with much of what is here put down. He himself considers that Hamley, though good enough for its purpose when first published, has by now become absolutely useless, and indeed harmful, for anyone who really wishes to learn strategy. What can be more absurd, for instance, than to put down Napoleon's splendid success in the Ulm campaign to the fact that he possessed an angular base, formed by the lines of the Rhine and the Maine?
