But there is only limited number of really global threats. Those include, inter alia, international terrorism, climate change, and the issue of nuclear proliferation. In its Resolution on the Convention on the Prohibition of Use of Nuclear Weapons, the UN General Assembly underlined that 'the use of nuclear weapons poses the most serious threat to the survival of mankind' . But despite a nearly universal recognition of the threat posed by the mere existence of the nuclear arsenals, the issue of further nuclear proliferation among the members of the international community is yet to be solved. In this paper, we attempt to conduct a comparative analysis of possible approaches to the issue of nuclear proliferation. The goal of the research, however, is not the elaboration of practical solution of the issue. We will focus on the conceptual value of the one or another option, instead. The aim is to define main dimensions of the problem that can be faced by the international community: be it in the universal fora (e.g., the UN General Assembly) or in the 'exclusive clubs' (the UN Security Council). First part will be dedicated to the theoretical approaches that may be employed in the research. Also, the framework for the comparative analysis per se will be defined. In the second part of the paper, we will focus on the determination of...
