THE RESILIENCE OF THE ELECTRIC POWER DELIVERY SYSTEM IN RESPONSE TO TERRORISM AND NATURAL DISASTERS: SUMMARY OF A WORKSHOP

[DOWNLOAD](#)

National Academies Press. Paperback. Book Condition: new. BRAND NEW, The Resilience of the Electric Power Delivery System in Response to Terrorism and Natural Disasters: Summary of a Workshop, Planning Committee for the Workshop on the Resilience of the Electric Power System to Terrorism and Natural Disasters, Board on Energy and Environmental Systems, Division on Engineering and Physical Sciences, National Research Council, David W. Cooke, The Resilience of the Electric Power Delivery System in Response to Terrorism and Natural Disasters is the summary of a workshop convened in February 2013 as a follow-up to the release of the National Research Council report Terrorism and the Electric Power Delivery System. That report had been written in 2007 for the Department of Homeland Security, but publication was delayed because of security concerns. While most of the committee's findings were still relevant, many developments affecting vulnerability had occurred in the interval. The 2013 workshop was a discussion of the committee's results, what had changed in recent years, and how lessons learned about the grid's resilience to terrorism could be applied to other threats to the grid resulting from natural disasters. The purpose was not to translate the entire report into the present, but to focus on key issues relevant to making the grid sufficiently robust that it could handle inevitable failures without disastrous impact. The workshop focused on five key areas: physical vulnerabilities of the grid; cybersecurity; mitigation and response to outages; community resilience and the provision of critical services; and future technologies and policies that could enhance the resilience of the electric power delivery system. The electric power transmission and distribution system (the grid) is an extraordinarily complex network of wires, transformers, and associated equipment and control software designed to transmit electricity from where it is generated, usually in centralized power plants, to...
